

Its December 2025 and rumour has it that the Gunnersbury Groundlings have written a letter to Shanta.

The Groundlings say that they have been very good - even this week they were busy planting bulbs in their Meanwhile Garden much to the approval of Gunnersbury Gus. Living in a telecom cabinet on the high road can be a little dull and he looks forward to enjoying the flowers that will bloom in the Spring.

The Groundlings wish is for Shanta to get his little helpers - the Cabinet elves - to deliver some parcels of CIL to their station. They already have two train sets, some tracks and a platform but they have run out of Lego to build stairs and a lift. The fat and thin controllers say that they will build these if someone can find them some bricks.

Locating some CIL bricks shouldn't be too difficult for the elves. There is plenty of elf storage in the big grey and red shed around the corner - Shure to be some CIL there.

Delivery is also at hand as Rudolph has been seen in the Chiswick Business Park - enjoying-a-break before enjoying-work on his big night.

Good luck Groundlings - we all hope your wishes come true.
